-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Drawings*

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the window and flap opening of claims 1 and 10 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

*Specification*

3. The incorporation of essential material in the specification by reference to an unpublished U.S. application, foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference, if the material is relied upon to overcome any objection, rejection, or other requirement imposed by the Office. The amendment must be accompanied by a statement executed by the applicant, or a practitioner representing the applicant, stating that the material being inserted is the material previously incorporated by reference and that the amendment contains no new matter. 37 CFR 1.57(f).

*Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2, 7, 10-11, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by JP '216.

JP 63020216 discloses an extendable protective awning for a vehicle, comprising: a base frame (Figure 2) fastenable to the vehicle; and a protective surface 2 movable between at least one retracted basic position and an extended end position (Figure 1) by a linkage (f); wherein the base frame is configured to be arranged in an interior of the vehicle a region of an upper

Art Unit: 3612

boundary of a flap opening (Figure 3) of the vehicle, the protective surface 2 extendable from the retracted basic position through an opened one of the flap opening into the end position.

With regard to claim 2, the base frame is integrated into a housing 3, an outer surface of the housing configured to match an interior surface in the region of the upper boundary of the one of (a) the door, (b) the window and (c) the flap opening.

With regard to claim 7, the protective surface includes a flexible web of material rollable within the base frame onto a roller, the roller prestressed to provide a movement to pull the web of material into the retracted end position.

For claim 10, JP '216 discloses a motor vehicle, comprising: an extendable protective awning, including: a base frame (Figure 2) fastened to the vehicle; and a protective surface 2 movable between at least one retracted basic position and an extended end position (Figure 1) by a linkage (f); wherein the base frame is arranged in a region of an upper boundary of one a flap opening in an interior of the vehicle, the protective surface extendable from the retracted basic position through an opened one of the flap opening into the end position.

With regard to claim 11, the base frame is integrated into a housing, an outer surface of the housing configured to match an interior surface in the region of the upper boundary of the one of (a) the door, (b) the window and (c) the flap opening.

With regard to claim 16, the protective surface includes a flexible web of material rollable within the base frame onto a roller, the roller prestressed to provide a movement to pull the web of material into the retracted end position.

*Allowable Subject Matter*

6. Claims 3-6, 8-9, 12-15, and 17-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Conclusion*

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
